

# Software Requirements Specification (SRS)

## Timetable Management System

### TABLE OF CONTENTS

#### **1. Introduction**

- 1.1 Purpose
- 1.2 Document Conventions
- 1.3 Intended Audience
- 1.4 Scope
- 1.5 Definitions, Acronyms, and Abbreviations

#### **2. Project Overview**

- 2.1 Background
- 2.2 System Objectives
- 2.3 Product Features

#### **3. Functional Requirements**

- 3.1 User Management
- 3.2 Timetable Generation
- 3.3 Timetable Management
- 3.4 Conflict Detection
- 3.5 Notification System
- 3.6 Reporting / Exporting
- 3.7 Role-Based Access Control

#### **4. Non-Functional Requirements**

- 4.1 Performance Requirements
- 4.2 Security Requirements
- 4.3 Usability Requirements
- 4.4 Scalability Requirements
- 4.5 Reliability & Availability

4.6 Maintainability

4.7 Portability

## **5. User Interface Requirements**

5.1 Landing Page

5.2 Login Page

5.3 Dashboard

5.4 Timetable Generation Interface

5.5 Timetable Management View

5.6 Conflict Warning Interface

5.7 User Profile Page

5.8 System Workflow & Navigation Diagram

## **6. System Architecture**

6.1 High-Level Architecture

6.2 Frontend Architecture

6.3 Backend Architecture

6.4 AI Microservice

6.5 Deployment Architecture

## **7. Technology Stack**

7.1 Frontend

7.2 Backend

7.3 Database

7.4 AI Components

7.5 Infrastructure / DevOps Tools

## **8. AI Features**

8.1 AI-Based Timetable Optimization

8.2 Historical Pattern Learning

8.3 Load Balancing Algorithm

8.4 Smart Room Assignment

## **9. Database Design**

9.1 ER Diagram (Text-Based)

9.2 Collections & Tables

9.3 Entity Attributes

9.4 Relationships

## **10. API Endpoints**

10.1 Authentication APIs

10.2 Timetable APIs

10.3 Course APIs  
10.4 Room APIs  
10.5 Conflict Detection APIs

## 11. Security Considerations

11.1 Authentication  
11.2 Authorization  
11.3 Data Validation  
11.4 Data Encryption  
11.5 Common Attack Prevention

## 12. Testing and Validation

12.1 Unit Testing  
12.2 Integration Testing  
12.3 Performance Testing  
12.4 User Acceptance Testing  
12.5 Security Testing

# 1. INTRODUCTION

## 1.1 Purpose

This Software Requirements Specification (SRS) defines all functional and non-functional requirements for the Timetable Management System—a full-stack web application built with React.js (frontend), Node.js/Express (backend), MongoDB (database), and optional AI microservices.

## 1.2 Document Conventions

- **Bold text** denotes major features or sections
- `Code-like formatting` denotes API paths or attribute names

## 1.3 Intended Audience

- System developers & engineers
- Project managers
- QA testers

- Educational institution planners

## 1.4 Scope

The system automates academic timetable creation, detects conflicts, manages schedules, and supports AI-based optimization.

## 1.5 Definitions

- **AI Optimization:** Algorithmic scheduling improvements
- **RBAC:** Role-Based Access Control

# 2. PROJECT OVERVIEW

## 2.1 Background

Manual timetable creation is error-prone and inefficient, especially for large educational institutions.

## 2.2 System Objectives

- Automate timetable creation
- Detect conflicts immediately
- Provide real-time updates
- Optimize scheduling using AI
- Support thousands of users reliably

## 2.3 Product Features

- Automated timetable generation
- Manual editing and session dragging
- Conflict detection
- Timetable publication
- Notifications
- Multi-role access control

## 3. FUNCTIONAL REQUIREMENTS

### 3.1 User Management

- Registration, login, logout
- Password recovery
- RBAC (Admin, Lecturer, Student)
- Profile management

### 3.2 Timetable Generation

Admin/Lecturer inputs:

- Department
- Semester
- Courses
- Lecturer availability
- Room constraints

System outputs:

- Draft timetable
- AI-assisted scheduling suggestions (optional)

### 3.3 Timetable Management

- Create, edit, delete timetables
- Modify individual sessions
- Drag-and-drop scheduling
- Validate timetable changes

### 3.4 Conflict Detection

Detects:

- Lecturer double-booking
- Room double-booking

- Time overlaps
- Capacity issues

### **3.5 Notification System**

Notifies users about:

- Conflicts
- Updates
- Published timetables

### **3.6 Reporting / Exporting**

Export formats:

- PDF
- Excel
- Printable HTML

### **3.7 Role-Based Access Control**

Admin:

- Manage full system  
Lecturer:
- View & update availability  
Student:
- Read-only timetable access

## **4. NON-FUNCTIONAL REQUIREMENTS**

### **4.1 Performance**

- Responses  $\leq 2$  seconds
- 500+ concurrent users
- DB queries  $\leq 150$  ms
- Timetable generation  $\leq 10$  seconds

## 4.2 Security

- Bcrypt password hashing
- JWT authentication
- Sanitization against XSS, injection
- HTTPS enforced
- Encrypted data at rest

## 4.3 Usability

- Clean, intuitive UI
- Mobile responsive
- Color-coded timetable
- Helpful error messages

## 4.4 Scalability

- Microservice-ready
- Kubernetes for horizontal scaling

## 4.5 Reliability & Availability

- 99% uptime
- Auto backups every 24 hours

## 4.6 Maintainability

- Modular components
- Service-layer architecture

## 4.7 Portability

- Works with all modern browsers

# 5. USER INTERFACE REQUIREMENTS

## 5.1 Landing Page

### UI Elements

- Title, branding
- System description
- Buttons: Login, Register
- Footer

### Functionality

- No authentication needed
- Routes to login/register
- Preloads major assets

## 5.2 Login Page

### UI Elements

- Email, password fields
- Remember me checkbox
- Forgot Password link

### Functionality

- Validates credentials
- Redirects based on role
- Stores secure JWT

## 5.3 Dashboard

### Admin Dashboard

- Statistics
- Quick links
- Activity logs

### Lecturer Dashboard

- Schedule
- Availability editing
- Conflict alerts

### Student Dashboard

- Timetable display
- Course list
- Notifications

## 5.4 Timetable Generation Interface

- Dropdowns for department, semester
- Course selection
- Lecturer availability
- Room constraints
- AI suggestion toggle
- Generate button

### Function Flow

1. User enters requirements
2. System validates
3. AI engine suggests optimal layout
4. Conflict engine checks mistakes
5. Draft is created

## 5.5 Timetable Management View

### UI Elements

- Grid layout
- Drag-and-drop classes
- Color-coded blocks
- Side info panel

### Functionality

- Real-time conflict checking
- Manual edits
- Version control
- Publish button

## 5.6 Conflict Warning Interface

Displays:

- Overlapping sessions
- Room/lecturer conflicts
- Missing constraints

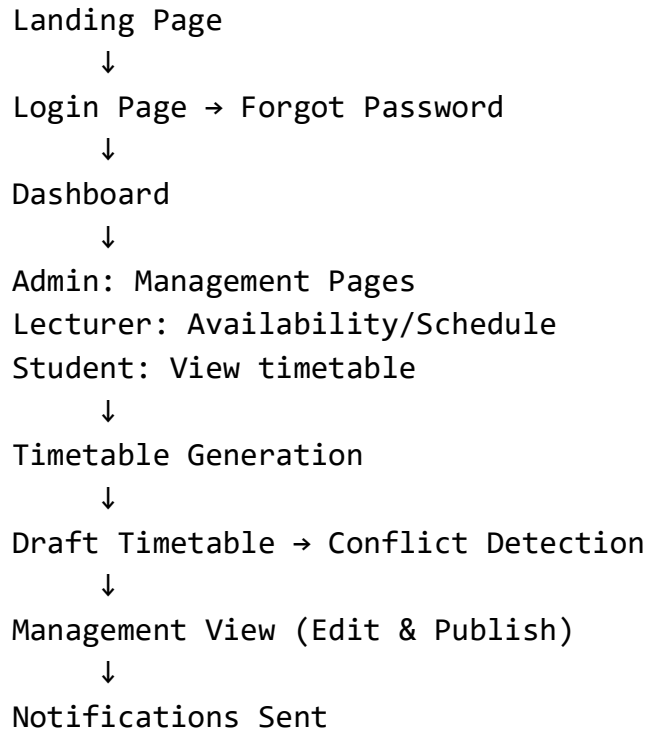

Provides:

- Fix suggestions
- Auto-resolve option

## 5.7 User Profile Page

- Update password
- Edit personal information
- Notification settings
- Availability management (lecturers only)

## 5.8 System Workflow & Navigation Diagram

## 6. SYSTEM ARCHITECTURE

### 6.1 High-Level Architecture

Frontend (React) ↔ Backend API (Express) ↔ Database (MongoDB)  
Optional AI Microservice (Python/FastAPI)

### 6.2 Frontend Architecture

- React functional components
- Context API / Redux
- Axios for HTTP requests

### 6.3 Backend Architecture

- Express routers
- Controller → Service → Repository

- JWT middleware

## 6.4 AI Microservice

- FastAPI (Python)
- Uses OR-Tools for optimization

## 6.5 Deployment Architecture

- Docker containers
- Nginx reverse proxy
- GitHub Actions CI/CD

# 7. TECHNOLOGY STACK

## 7.1 Frontend

React.js, Tailwind CSS, Axios

## 7.2 Backend

Node.js, Express.js

## 7.3 Database

MongoDB, Mongoose ORM

## 7.4 AI Components

Python, Scikit-learn, OR-Tools

## 7.5 Infrastructure

Docker, Kubernetes, Nginx

## 8. AI FEATURES

### 8.1 AI-Based Timetable Optimization

Uses:

- Lecturer availability
- Room type
- Time constraints

### 8.2 Pattern Learning

Learns:

- Room usage
- Lecturer load

### 8.3 Load Balancing

Prevents lecturer overloading

### 8.4 Smart Room Assignment

Matches rooms by:

- Size
- Type
- Proximity

## 9. DATABASE DESIGN

### 9.1 ER Diagram (Text-Based)

Users ---< Timetables >--- TimetableEntries  
Courses ---<  
Rooms ---<

Lecturers ---<

## 9.2 Collections & Attributes

Tables:

- Users
- Courses
- Rooms
- Timetables
- TimetableEntries

(Attributes already defined)

# 10. API ENDPOINTS

## Authentication

POST /api/auth/login  
POST /api/auth/register

## Timetables

POST /api/timetables  
GET /api/timetables  
PUT /api/timetables/:id  
DELETE /api/timetables/:id

## Conflicts

POST /api/conflicts

# 11. SECURITY CONSIDERATIONS

## 11.1 Authentication

- JWT access/refresh tokens

## 11.2 Authorization

- RBAC middleware

## 11.3 Data Validation

- Joi validation schema

## 11.4 Encryption

- Bcrypt
- HTTPS

## 11.5 Common Attack Protection

- Rate limiting
- CORS
- CSRF tokens
- Helmet.js headers

# 12. TESTING AND VALIDATION

## 12.1 Unit Testing

- Jest
- React Testing Library

## **12.2 Integration Testing**

- Supertest

## **12.3 Performance Testing**

- JMeter
- Locust

## **12.4 User Acceptance Testing**

## **12.5 Security Testing**

- Vulnerability scanning
- Penetration testing
